

Appointment System

User Manual

Version 9.08, January 25, 2024

This appointment system was developed by AARP Foundation Tax-Aide volunteers from Colorado to replace various paper or spreadsheet type systems. It provides a convenient platform for managing appointments for individual sites, coordination of scheduling across multiple sites, or a central scheduling point for many sites. New sites and users can be added by any Appointment Manager and users can be assigned either viewing or scheduling permissions at their own or multiple sites as desired. Sites can optionally allow internet access to taxpayers for scheduling their own appointments or add themselves to a callback list for subsequent scheduling.

Scheduling

Views

Each view has a menu line, a view selection box, a site list, a calendar, and an appointment area.

Menu Line	
View selection	Appointment area
Site list	
Calendar	

Menu Line

The search menu allows you to find a scheduled taxpayer by tag, phone number, name, or email. If searching by phone, include dashes. You can click on the name in the list to go to their appointment if you are allowed access to that tax site.

The reports menu provides a variety of reports. The check-in list and ERO checklist are only available when in the daily view. The site status summary shows how many appointments have been made, the number made via the internet and how many are available or reserved. Export to Excel is only available if you have permission to make appointments.

The Tools menu is used to set up appointments and to set up options for the site and user permissions. This is only available to Appointment Managers.

The Help menu takes you to this document or to a website for your home site if one has been set up by your Appointment Manager. It's a great place to put specific procedural instructions for your site.

View Selection

There are five different views that differ in the Appointment area. The desired view is selected by buttons which indicate the current view with a green color, or views that are not accessible (perhaps when moving an appointment) with a red color.

Additionally, the text in the "Callback" or "Deleted" view buttons will have blue text if a taxpayer has added or removed their name via internet scheduling – you may want to follow up with them. The blue text on these buttons will return to black after any action is made for that appointment record. The fifth view is the one that a taxpayer will see if they are registering by internet. It looks like the Summary view but with less information.

☒

 Winesap Library

The site list section shows the sites available for scheduling and for which you have permissions to access. For each box checked, the appointments related to that site will be shown in the appointment area of the view. To check multiple boxes, hold the PC Ctrl key down as you click each box (check or uncheck). When you release the Ctrl key, the view will refresh to the new configuration. The SELECT ALL and SELECT NONE are only available to the Administrator.

Calendar

June					2023	
				1	2	3

16	17	18	19	20	21	22
23	24	25	26	27	28	29

The calendar shows the availability of appointments for each date. The current date has a box around it. A green background indicates that appointments are available; red indicates all appointments are filled or is a date prior to the current date; orange indicates that all appointment times for that date have been reserved (more on that later). If the date number is shown in blue, an appointment on that date has been made by a taxpayer using internet access and you may wish to follow up with a phone or email contact. Hover over the date to see how many appointments are available on that day and how many are reserved.

Click on the date and you will jump to the daily view for that date.

Appointment area

The appointment area lists the times available for scheduling or names that are on the callback or deleted list. The details vary with the view.

The Summary view shows the status of all appointments, listed by date and time. For each date there are time boxes, the color of which indicates the availability of appointments and whether some appointment slots are reserved. The number in parentheses in the time box indicates the number of appointments available for scheduling and may or may not include reserved slots, depending on your site option.

Normally, only dates starting with the current date are shown but there is a checkbox above the first date titled “Show all dates” that allows showing earlier dates to view the earlier history. Use the site checkboxes to indicate the appointment slots for which sites you wish to see.

Click on the time box to bring up the appointment registration form.

Click on the date column area or the date on the calendar to move directly to the Daily view.

Daily view

The screenshot shows the 'Daily view' interface. On the left is a calendar for June, July, and August 2023. The 'Daily' button is selected. On the right, a table lists appointments for Tuesday, June 20, 2023. The table has columns: ID, Name, Phone, Note, Info, and Status. Appointments are listed in time slots: 08:00 am, 09:00 am, 10:00 am, 11:00 am, and 12:00 pm. Some appointments are highlighted in green, indicating they are available. Some have a circled 'R' in the Info column, indicating they are reserved. The Status column shows the most recent action taken on behalf of the taxpayer, including dates, times, and actions like 'Added to 06/08_11:41am' or 'Reserved by'.

Appointments for Tuesday, June 20, 2023:					
		Phone	Note	Info	Status
08:00 am (Apple Valley Senior Center)					
1	Nancy Drew [Son John has POA]	1-503-555-8399	<input checked="" type="checkbox"/>	⚠	06/08_11:41am: Added to 06/08_11:41am

12:00 pm (Apple Valley Senior Center)					
1					

Clicking on the Daily view button will open to the date with the first available appointment slot.

The Daily view shows the details of the time slots available for the sites checked in the site list for that date, listed in time order. Available appointments are highlighted in green (either RESERVED or not). Clicking on an available appointment will allow assigning that appointment using a scheduling form (described later). Clicking on an assigned appointment will allow changes to the scheduling form or moving the appointment to a different location, time or date or deleting the appointment.

The name column is free format. Whether you use first- or last-name first is a site procedure decision. Click on the circled “R” to make an idle slot reserved or unreserved if you have permission to do so.

The bolded text in brackets (see Nancy Drew above) is a free-format field for entering information that you may wish to search for later. You could use specific “tag” words or longer text as shown. This information is not printed on the check-in list or the ERO checklist.

The phone number is forced to be 7- or 10-digits with an optional 1- and is required. Alternate phone numbers could go in the Info column. If the taxpayer does not have a phone, use 000-000-0000. If the browser and system you’re using has the capability, clicking on that link will open a phone function and you can use that to call the taxpayer (not on most PCs, but possibly on a tablet or for sure, a cell phone).

If the Note column has a checked box in it, there is a note in the scheduling form and hovering the mouse over the box will display that note. The note will be printed out as a footnote on the check-in list.

If the Info column has a warning symbol, there is information in the scheduling form and hovering the mouse over the box will display that information.

The Status column shows the most recent action taken on behalf of the taxpayer with date, time, action taken and who took that action – a good reason for each Scheduler to have their own personal login. To see the entire text of the latest action, hover the mouse over that cell in the table. If the Status cell has a blue background, it indicates that the taxpayer has made the entry via the internet, and you may wish to

follow up to verify their need to file or if they have any scope issues. Once such a contact or other action is made, the blue background goes away but the text and border remain blue.

If you move or copy a taxpayer to a new time and date (as with Bill & Betty Evans above), the appointment number is highlighted in gold to make that move easy to identify to help you assure that the move or copy was successful. When any additional action is taken, that highlight goes away.

For Appointment Managers only, the red minus (-) and plus (+) boxes are quick ways to add or remove empty slots to that time group without using the Configurator. It will not remove a slot that is being used nor one that has been RESERVED. Also, at the bottom of the list of appointments is an option to allow adding a new time group to that date for any site for which you have Appointment Manager permissions.

Callback list

The screenshot shows the 'Callback List' interface. On the left, there's a sidebar with a calendar for June 2023. The main area displays two lists of taxpayers, each with columns for 'Phone', 'Note', 'Info', and 'Status'.

Callback List (Apple Valley Senior Center)			
	Phone	Note	Info Status
1	John Doe	384-555-3822	06/16_02:57pm: Copied to Ca
2			

Callback List (Mountain Ridge National Bank)			
	Phone	Note	Info Status
1	John Doe	384-555-3822	06/17_07:34am: Sent docume
2	Mary Jones	492-555-2842	06/08_12:11pm: Moved to Ca
3	Sally Martin	384-555-2744	06/08_12:11pm: Moved to Ca
4			

At the bottom, there's a section to 'Add' additional reserved entries for the 'Apple Valley Senior Center' with a '(Click to add)' button.

The Callback list is like the Daily view and shows all taxpayers that are awaiting appointments after a phone (or personal or email) contact from a taxpayer requesting an appointment. Each site selected on the site list will have its callback list shown. As with the Daily view, blue highlighting in the Status column means that a taxpayer has entered their name on the Callback list via the internet. If a taxpayer on the Callback list has an appointment or is on the Callback list at any other site, a small calendar icon will appear in the Info column. Opening the appointment box for the taxpayer will give additional information.

If you are not able to make the appointment, add the new contact in the green line at the bottom of the list. A new green line will appear for the next new taxpayer.

When ready to make the appointment, clicking on an existing name will allow changes to the client information on the appointment form, moving the taxpayer to an assigned appointment or deleting then taxpayer's entry if you are only answering the taxpayer's questions.

The bottom "Click to add..." option is for the rare case when, in using an answering machine that forces one to get the most recent messages first, you can explicitly add the number of expected messages as "Reserved for #1" through "Reserved for #n" entries and use them to enter the answering machine messages in reverse order to preserve their position in queue. These can only be added to the scheduler's home site.

When a person is moved to or from an appointment or from the Deleted list, their number entry in the Callback list is highlighted in gold as described earlier so that they are easier to find if need be.

Deleted list

The Deleted list is identical to the Callback list without the "Click to add..." option.

Names on the Deleted list cannot be removed until the Appointment Manager specifically removes them. This preserves the history of the site's handling of the taxpayer in the event of questions or the need to review actions taken by Schedulers for a particular taxpayer.

Taxpayers can always be moved back to the Callback list or to a scheduled appointment from the Deleted list.

Welcome Roger,
To sign up for an appointment:

1. Click on a green time in the list below.
2. In the information box that appears, enter your (and spouse's) names. (If your phone number or email address needs to be changed, please do so from the [login page](#).)
3. In the notes section, indicate which year (if not the current year) and if it is an amended return. Also, enter any other information you think we might need (interpreter, access issues, alternative phone, etc).
4. Click on the "Save" button to finalize the appointment.
5. You will be sent confirmation of your appointment to the email address you entered. (Check your SPAM/Junk mail folder too.)

Additional information for theApple Valley Senior Center:
 To make your appointment more efficient, please complete the following documents before your appointment:
 - Intake booklet (<https://cotaxaide.org/docs/i-booklet.pdf>)

The User view is like the Summary view and lists all sites open for internet scheduling but only one site can be selected at a time. It only shows available schedule dates and times and allows the taxpayer to add themselves to the callback list if they have questions.

This view is not available to the Scheduler and the taxpayer does not have access to other views.

If the site name is followed by a dagger notation, no schedule is shown, and the user can only add their name to the callback list (see the Winesap Library above).

When a choice is made, the taxpayer will be presented with a box which auto-fills with their login information. They can modify this information and add to the notes section to provide additional information.

Additional information for theApple Valley Senior Center:
 To make your appointment more efficient, please complete the following documents before your appointment:
 - Intake booklet (<https://cotaxaide.org/docs/i-booklet.pdf>)
 - Deductions (<https://cotaxaide.org/docs/i-deductions.pdf>)
 - Self-employment worksheet (<https://cotaxaide.org/docs/i-selfemployed.pdf>)
 - Education worksheet (<https://cotaxaide.org/docs/i-education.pdf>)

The screen will then show a list of appointments made by the taxpayer.

If the taxpayer is limited by the number of appointments they can make using the same email, the schedule is no longer shown and a message indicating the limitation is presented.

	You are currently scheduled at the following time(s): <ul style="list-style-type: none">• 08:00 am on Thursday, June 8, 2023 at the Apple Valley Senior Center (Cancel)
	Other appointments made from your same phone number: <ul style="list-style-type: none">• Bill and Betty Evans, on the callback list at the Apple Valley Senior Center (Cancel)
<hr/>	
<div>You will need to cancel a current appointment if you wish to make another. If you need additional appointments, please request a callback. Click on the following button to give us your contact information: Click to request a callback</div>	

Appointment schedulers should always look for the blue highlighting that results from a taxpayer who has registered via the internet to be sure that there are no questions to be answered or other follow-up needed. Click on one of the contact history buttons to clear the blue.

How to...

add an appointment:

From the Summary View, click on a green- or yellow-highlighted time box to bring up the appointment form. If the Appointment Manager allows the option to schedule RESERVED slots from this view, you can also click on the orange-highlighted time box. If not allowed in this view, you will have to go to the daily view by clicking on the date box or calendar day to use them. Empty, non-RESERVED, slots will always be chosen first.

From the Daily View or the callback list, click anywhere on any green line, RESERVED or not, and the appointment form will appear. Individual schedulers may or may not have permission to make appointments in the RESERVED slots.

12:00 pm (Apple Valley Senior Center)

Contact history:

Other:

06/17_11:03am: Email sent to nancy@juniorinvestiveorg.orgx (RosaA)
06/17_11:03am: Moved to 08/10 at 08:00 at Apple Valley Senior Center (RosaA)
06/17_11:02am: Sent documents (RosaA)
06/17_11:02am: Added to 08/08 at 08:00 at Apple Valley Senior Center (RosaA)

As a minimum, enter the client's name(s) and phone number in the pop-up box and click "Save". An entry will be automatically added to the Contact history section. Both are required. If there is no phone number, enter 000-000-0000 (or click the NONE button).

If you enter an email address, an email will be sent to the taxpayer when you schedule or move the appointment if set up by the Appointment Manager to do so. If a taxpayer makes their own appointment from the internet, the email address is required and thus will also result in the confirmation email. A note that the email was sent will be added to the contact history list.

There are three boxes for adding additional information. Why 3? Experience has shown that many schedulers were adding additional "codes" after the taxpayer's name to be used for searching or to catch attention for a particular situation. While functional, it added clutter to the check-in and ERO reports. Thus, the different ways to provide additional information...

Tags: If there are reasons to search for the taxpayer other than by name, phone, or email, you can add a "tag" in the Tags box. For example, if there are those who ask for earlier appointments should a cancellation occur, you might add "Move up" in the Tags box. The tag will appear after their name in the schedule screens enclosed in brackets, for example: **[Move up]**.

Notes: If the client has a special need, enter it in the Notes box. This is a good place to indicate any physical or mental challenges, interpreter needs, other tax year or amendment to be made. This information will be printed as a footnote on the check-in list.

Info: Other information such as questions the taxpayer may have or concerns that need to be addressed during scheduling can be entered in the Info box. This is shared with the appointment schedulers and is not printed on the check-in list.

Name:	searchable	Prints with the name on all reports
Tags:	searchable	Displays with the name in PC appointment screens only
Notes:	not searchable	Prints as a footnote on the check-in list only
Info:	not searchable	Only displays in the PC appointment detail window

Whenever you contact the taxpayer, add a new entry in the "Status" area to indicate the action. The most common entries have their own button. If you need some other statement, just enter it in the "Other" box and it will be added when you exit the box – do not add the time stamp or your name; the system will do it.

If you have done this from the Summary view, after you click "Save", you will automatically move to the daily view and the entry you made will have a highlighted number in the first column to help you find it to verify that it did what you expected.

If more than one person is making appointments at the same time, there is a chance that you both will choose the same time slot. If that happens, the first one to click "Save" will get the time slot and the other will get a message to try a different time. If significant time has passed, it's always a good idea to click on the date or summary view button to refresh your screen to show the most current status.

Along the bottom of this window, a list of any other appointments or callback list entries that match the phone number or email will be shown.

Whenever any change is made, be sure to click "Save" to save the change! "Close" will close the window without saving any changes.

move an appointment:

From the Daily view, click on the current appointment line and choose "Move Appt". This will open a small window that indicates that you are moving an appointment. Check the box if you do not want anyone to use the slot from which the appointment is being moved.

You are moving the appointment for Roger Evans

Click on the calendar date and time slot you want the appointment moved to, or click on **Cancel** to leave this client where they are.

☐ Check to mark the old time slot as RESERVED.

Click on the desired new calendar date, the Summary view button, Daily view button, or Callback list button, find a new empty slot and click on it. That's all there is to it. Again, the new entry will have the slot number highlighted so you can easily find it to verify that the move worked as expected.

If you have permission from other sites, you can even add or move appointments to other sites.

When you move the appointment, an entry will automatically be added to the History list and a new email will be sent to the taxpayer confirming the new appointment if they have an email address in their record and the Appointment Manager has opted to have emails sent.

copy an appointment:

You can copy an appointment in the same way as moving it. The only difference is that the original appointment is retained. This makes it easier to make additional appointments for other years or to re-schedule a taxpayer for a return visit if needed.

delete an appointment:

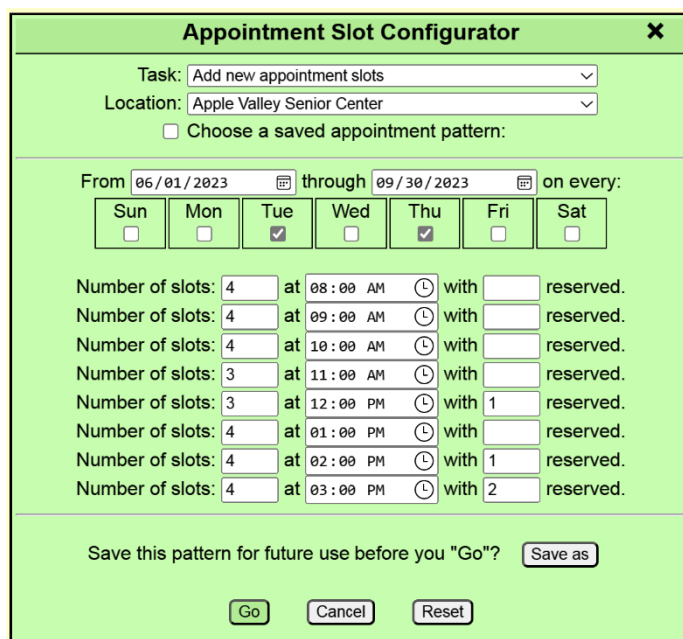

You can't delete an appointment entirely because it would be difficult to recover from a mistake. That's why the deleted list exists. To move an appointment to the Deleted list, simply click on the "Delete" button and it will make that change and record the action in the History list. That taxpayer can always be re-scheduled or added to the Callback list if needed.

send email:

Click to send an email to the taxpayer. This will open your PC's email program to let you enter a personalized message to the taxpayer. The appointment system has no way to detect that you have sent an email so you may want to click the "Responded by email" contact history button to indicate that you are doing so. Be sure you have saved any changes – this will close the window.

Site Management

Configuring appointments

The Appointment Slot Configurator window is a green-themed interface for setting appointment slots. It includes a title bar with a close button (X). The main area contains several sections: a 'Task' dropdown menu set to 'Add new appointment slots', a 'Location' dropdown menu set to 'Apple Valley Senior Center', and an unchecked checkbox for 'Choose a saved appointment pattern:'. Below this is a date range selector 'From 06/01/2023 through 09/30/2023 on every:' followed by a row of seven checkboxes for the days of the week (Sun, Mon, Tue, Wed, Thu, Fri, Sat), with 'Tue' and 'Thu' checked. The next section lists eight time slots, each with a 'Number of slots' input, a time 'at' dropdown, a 'with' dropdown, and a 'reserved' checkbox. The slots are: 08:00 AM (4 slots, reserved), 09:00 AM (4 slots, reserved), 10:00 AM (4 slots, reserved), 11:00 AM (3 slots, reserved), 12:00 PM (3 slots, reserved), 01:00 PM (4 slots, reserved), 02:00 PM (4 slots, reserved), and 03:00 PM (4 slots, reserved). At the bottom, there is a 'Save this pattern for future use before you "Go"?' checkbox, a 'Save as' button, and three buttons: 'Go', 'Cancel', and 'Reset'.

From the Tools menu, select “Configure appointment slots” to open the configurator window.

Several options are available as Tasks and as each task is selected, the required data needed is displayed.

Add new appointment slots

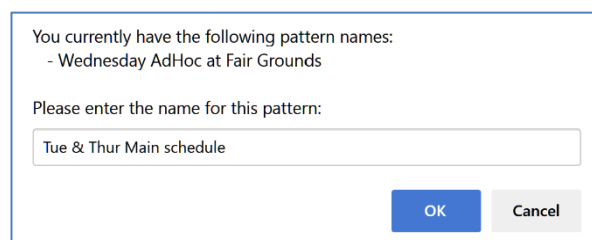

To configure your appointments, select “Add new appointment slots”, your site Location name, the days of the week you will be working and the date range. Enter the number of slots at each time group and if any should be RESERVED.

Click “Go” and you’re done!

The purpose of making some slots RESERVED can serve several purposes:

- They can never be selected by taxpayers who self-register from the internet.
- They can give some flexibility in scheduling to “see how things go” particularly at the beginning or end of the day or around lunch time.
- They can be used to assign times for taxpayers that have significant work remaining when they must return.

If different work days have different schedules, the Add option can be used multiple times and if duplicate times are encountered, it will add the specified number of slots to those already present.

A small dialog box with a blue border. It contains the text 'You currently have the following pattern names:' followed by a list item '- Wednesday AdHoc at Fair Grounds'. Below this is the prompt 'Please enter the name for this pattern:' and a text input field containing 'Tue & Thur Main schedule'. At the bottom right are two buttons: 'OK' and 'Cancel'.

You may wish to save your appointment pattern before you click the “Go” button. You can then recall that pattern to be used later.

- Perhaps one of the Mondays is a holiday but is one of your normal workdays. Just recall your pattern and add for the dates prior to the holiday, and again for the dates after the holiday.
- If you have multiple sites using the same or similar schedule, recall a saved pattern, change the site name, and then save it (or as modified) to the new site or simply click “Go”.
- If you want to remove some unused appointments, recalling the saved pattern can save time inputting the original data. Just change the dates and the number of slots to be removed.

Before you click “Go”, check the Task selected and the site selected to be sure you are doing what you are expecting! Some things are not recoverable.

Clear names from existing slots

If you use your real schedule for training, you can use the “Clear” option to remove names from your schedule so that you can start fresh with real taxpayers. *You never want to use this option during the working season.* It will not remove the deleted list – you will need to do that separately.

Delete all in the callback list

This option moves all in the callback list to the deleted list. Rather than remove these entries, moving them to the deleted list preserves the taxpayer’s history until the end of the season, at which time it is safe to fully remove the season’s records (after exporting the records for possible future reference).

Clear and remove the deleted list

This option is often used with the previous one when you wish to clear out your schedule. It’s a good idea to not use this option during the working season because you will lose the historical information about taxpayers you have determined no longer require appointments.

Remove unused appointment slots

If you mistakenly created too many time slots for a date or time, you could use the “Remove” option to remove them. Another option is to go to the date and time and use the “+” and “-” buttons to make those adjustments.

This option will not remove any slot with a name entry, including RESERVED. This makes it safe to use during the working season.

Remove all appointment data between specified dates

This option allows removal of appointment time slots and its data between two dates (inclusive). You should not use this option to remove data for dates in the current working period unless you know they contain no working data (like a holiday, for example).

It does not remove callback or deleted data that may have occurred between those dates.

Start over – remove all appointment data

The “Start over” option is the preferred way to totally clean out your appointment schedule and will also clear the Deleted list. With this option, the only entry presented will be the site name. You may wish to export your data to Excel before using this option and you certainly will not want to use it during the working season.

If you have saved your appointment pattern(s), this is an easier way to restore your schedule after training than clearing the names and removing the deleted list.

Clone schedule from previous year

If you were completely happy with the previous year’s schedule, put in the new year’s date range and it will attempt to duplicate what was set up the previous year. Examine the first and last dates and holidays carefully because there may not have been an equivalent schedule for those days the previous year due to the way the calendar dates shift. RESERVED slots are not preserved as such but created as normal non-RESERVED slots since they will have likely changed during the previous year.

Adjustments can always be made from the Daily view.

This option will also clear the Deleted list and all data prior to your new starting date.

Export site data to Excel

There may be occasions when a spreadsheet of appointments and/or taxpayer information is needed. You can export data from one or more of your accessible sites, as selected in the site list.

Export Site Data ✕

☒ **SELECT TO EXPORT** Select All

SKIP RECORD IF NULL ☒

<input checked="" type="checkbox"/> LOCATION	
<input checked="" type="checkbox"/> DATE	<input type="checkbox"/>
<input checked="" type="checkbox"/> TIME	<input type="checkbox"/>
<input checked="" type="checkbox"/> NAME	
<input checked="" type="checkbox"/> PHONE	<input type="checkbox"/>

<input checked="" type="checkbox"/> APPT BY INTERNET	<input type="checkbox"/>
<input checked="" type="checkbox"/> CONTACT HISTORY	

☐ Jun 8, 2023 only

Export Cancel

This is done from the Reports menu.

A list of available data fields will be presented over the current window. Select the fields you wish to export by checking the box to the left of the field name.

You can rearrange the fields by dragging the field box into a desired position. The selected fields do not have to be adjacent to one another and unselected fields are not included in the resulting export file.

The export file is always sorted by LOCATION, DATE, and TIME. Use Excel to sort the data in other ways if you wish.

On most fields, there is a box on the right side which, if checked, will normally skip any records that has no information in that field. The example here indicates that a record will not print if there is no email. Some fields, like LAST REMINDER, work the opposite – it will only print if there was no last reminder. Hover over the checkbox to see what the condition for that field is.

The resulting file that is created is a tab-separated text file with an “.csv” file type.

Your arrangement is saved so that the same report will be produced the next time you decide to do an export.

To produce a report for just a single day, open the Daily View for that date and a checkbox will appear at the bottom of the data fields list. Check the box and Export.

Site Options and Permissions

Site options and user permissions use the Site and User Administration screen accessed from the Tools menu or from the login window. This is only available to the site's Appointment Manager. There are three tabs on the screen:

The screenshot shows the 'Site Options' tab of the 'Site being managed: Apple Valley Senior Center' screen. The interface includes a top navigation bar with 'Manage appointments', 'Search', and 'Sign out'. Below the site name, there are three tabs: 'Site Options', 'Schedulers', and 'Taxpayers'. The 'Site Options' tab contains a form with the following fields and options:

- Add a new site** (button)
- Current site name:** Apple Valley Senior Center [SITENAME]
- Address:** 1000 Apple Parkway [ADDRESS]
- City:** Apple Valley **State:** CO **Zip:** 80999 [CITY] [STATE] [ZIP]
- Contact:** [CONTACT]
- Appointment phone:** 303-555-1234 **Email:** avsc@applevalleycommunity.test [PHONE] [EMAIL]
- Website:** http://cotaxaide.org/ [WEBSITE]
- Email messages:** ☐ Send confirmation email if taxpayer has an email.
- Site options:** ☐ Allow scheduling of reserved slots in Summary View (empty slots are always chosen first)
☒ Require 10-digit phone numbers with optional toll prefix (recommended)
- Internet access:** ☐ Allow internet taxpayers to make their own appointment.
- Other site access:** ☐ Allow other sites to view or schedule your taxpayers.

At the bottom of the form are three buttons: 'Save changes', 'Cancel', and 'Delete this site'.

Menu items allow you to switch to the Manage appointments screen described earlier, to search for a person by name, phone, or email, and to sign out. The search menu only locates people who can log into the system – it will not find people nor specific appointments from the appointments screen.

The top box below the menus indicates the Site being managed. If you have access to more than one site, this is where you choose the one for which you want to set options.

Besides your home site, there is a site called “Unassigned” for which you cannot set any options nor change its name. This allows access to any Taxpayers who have logins but have not yet made an appointment at any site.

The Site Options tab lists all the options available to the site. All but the site name is optional, but the other site information is important, and an appointment Email contact is required if you will be sending emails to taxpayers as confirmation of their appointment.

Email messages option:

To enable email messages, click on the option box and additional fields will be displayed

The screenshot shows the 'Email messages' section of the 'Site Options' tab. It includes a 'View' button and a list of options:

- ☒ Send confirmation email if taxpayer has an email.
- ☒ Send a reminder email 7 days prior to the appointment, unless it's been 14 days or less since the last email.

Below these options is a text area for the email message content, which includes a 'View' button and a scrollable list of shortcodes:

Welcome, [TPNAME]:

This is to confirm your appointment with AARP Tax-Aide to assist in preparing your tax return.

You are scheduled for [TIME] on [DATE] at the [SITENAME] [ADDRESS] [CITY], [STATE] [ZIP]

The message can contain any of the shortcodes listed above as well as the following:

- [TPNAME] (Taxpayer's name(s))
- [DATE] [TIME] (Appointment date & time)
- [STATESITE] (State website)
- [ATTACHMENTS] (Check which below)
- ☐ Intake documents
- ☒ Intake booklet
- ☒ Deductions
- ☒ Self-employment worksheet
- ☒ Education worksheet

The email message can be edited as desired and the [shortcodes] will be replaced with the corresponding real information when the email is sent. You may want to modify the message with additional specific information or instructions unique to your site or to delete some of the information in the default message.

The [ATTACHMENTS] shortcode inserts web site links to documents. The list that follows is set up by the system administrator and you can select the attachments you want to include in the email by checking the appropriate box(es). This does not produce a proper email attachment but results in a list of the attachments and their web address. Hover the mouse over the checkbox to see the web address.

You will want to put instructions prior to the list so the taxpayer knows what to do with them. For example:

Please download the following documents and bring them with you completed to reduce the time you will spend when you arrive at the Senior Center:

[ATTACHMENTS]

If you checked the 2nd and 3rd attachment boxes, the result will be:

Please download the following documents and bring them with you completed to reduce the time you will spend when you arrive at the Senior Center:

- Intake booklet (<https://cotaxaide.org/docs/book.pdf>)
- Deductions (<https://cotaxaide.org/docs/ded.pdf>)

This shortcode can also be used in the additional instructions message described below for those taxpayers who are making their own reservations online. The same list is produced in that message.

You can also specify individual attachments in-line by surrounding the document name with brackets:

If you have education expenses, also fill out the [Education expenses] document too.

To revert to the default message, simply delete the entire message. When you save the changes, the default message will be added.

Emails are sent when an appointment has been made for a taxpayer or moved to a different appointment slot if the taxpayer has an email.

Click the view button on the left to see what the message will look like.

An additional option is to send reminder messages shortly before the taxpayer's appointment. The number of days prior to the appointment is set, and to prevent the reminder from seeming like a nag, set the "unless it's been" option to something larger.

Site options:

Site options:	<input type="checkbox"/> Allow scheduling of reserved slots in Summary View (empty slots are always chosen first)
	<input checked="" type="checkbox"/> Require 10-digit phone numbers with optional toll prefix (recommended)

The option to "Allow scheduling of reserved slots in Summary View" is checked if you want the system to use RESERVED slots when an appointment is made by selecting a time box from the Summary View. Empty non-RESERVED slots are always selected first but you may wish for your Schedulers to go to the daily view so that the use of the RESERVED slots is deliberate rather than just because all the non-RESERVED slots have been used.

The original intent of RESERVED slots is to limit the number of appointments that an internet taxpayer can schedule in any time group so that the RESERVED slots can be used by your own Schedulers.

The option to "Require 10-digit phone numbers" is becoming a necessity given the number of people who are retaining their cell phone numbers as they move about the country. It is set by default but can be unchecked if this is not an issue for your site.

Internet access options:

Checking the “Internet access” box produces some additional options:

The screenshot shows a web form titled "Internet access:" on a light green background. On the left, there is a vertical sidebar with a "View" button. The main area contains the following options:

- ☒ Allow internet taxpayers to make their own appointment.
- Internet access open: through:
- Callback list options:
 - ☐ Always allow to add to callback list.
 - ☒ Only add to callback list if callback list is longer than available appointments (recommended).
 - ☐ Cannot schedule own appointment. Can only add to callback list.
 - ☐ Can only schedule own appointment. Cannot add to callback list.
- Limit a taxpayer's internet scheduling to appointment(s), including at other sites.
- Additional instructions for the taxpayer for this site:

To make your appointment more efficient, please complete the following documents before your appointment:
[ATTACHMENTS]

This message will be displayed after the general instructions on the taxpayer self-appointment page.
[TPNAME], [DATE] & [TIME] shortcodes are not supported in this message.
Leave blank to omit the message.

You can limit the number of appointments a taxpayer can make from the internet.

You can restrict internet users from only adding their name to the Callback list always, or only if the Callback list exceeds the number of available appointments, or no restriction at all. If you restrict the taxpayer to the callback list, a dagger will appear after your site's name in the taxpayer's User View.

You set the dates when internet access is open for scheduling. This causes your site to be listed on the sign-in window and if the current date is earlier than the opening date, the opening date will tell the taxpayer when to come back and try again.

You can give additional instructions to the taxpayer when they make their appointment by entering that information as text. (Do not paste directly from MS Word – some of the characters do not paste properly. Save the document as a text file first or use a text editor.)

The View button allows you to see what the result will look like on the taxpayer's appointment screen.

Other site access options:

If you are cooperating with other sites in the appointment process, check the “Other Site Access” box. A listing of all the sites using the appointment system will be listed:

Other site access:	<input checked="" type="checkbox"/> Allow other sites to view or schedule your taxpayers.														
	<table><thead><tr><th>Allow</th><th>Site Name</th></tr></thead><tbody><tr><td><input checked="" type="checkbox"/></td><td>Apple Valley Senior Center</td></tr><tr><td><input checked="" type="checkbox"/></td><td>Eden Valley Community Center</td></tr><tr><td><input type="checkbox"/></td><td>Mountain Ridge National Bank</td></tr><tr><td><input type="checkbox"/></td><td>Pleasant Valley Community Church</td></tr><tr><td><input type="checkbox"/></td><td>Skyridge Ski Lodge</td></tr><tr><td><input type="checkbox"/></td><td>Winesap Library</td></tr></tbody></table>	Allow	Site Name	<input checked="" type="checkbox"/>	Apple Valley Senior Center	<input checked="" type="checkbox"/>	Eden Valley Community Center	<input type="checkbox"/>	Mountain Ridge National Bank	<input type="checkbox"/>	Pleasant Valley Community Church	<input type="checkbox"/>	Skyridge Ski Lodge	<input type="checkbox"/>	Winesap Library
	Allow	Site Name													
	<input checked="" type="checkbox"/>	Apple Valley Senior Center													
	<input checked="" type="checkbox"/>	Eden Valley Community Center													
	<input type="checkbox"/>	Mountain Ridge National Bank													
	<input type="checkbox"/>	Pleasant Valley Community Church													
	<input type="checkbox"/>	Skyridge Ski Lodge													
<input type="checkbox"/>	Winesap Library														

Click on the associated “Allow” box to give another site the ability to schedule appointments or to see the availability (Summary view only) of appointments at your site. This brings up the list of all schedulers in that site to be displayed in your Schedulers tab. Then, in your Schedulers tab, you can assign permissions to your site on an individual basis. This does not affect their permissions on their home site. More about that later.

Add a new site

You can add a new site by clicking the “Add a new site” button on the top left corner of this tab. It will open a new version of this same tab into which you will enter the name of the new site and its respective information. **Please always name the site beginning with the city name so that internet users can find it easily.**

Note: If you want to create a test or administrative “site” that you wish to not appear in the statistics report, include a carat (“^”) in the name.

Why add a new site?

- You have one or more ad-hoc sites
- You want to set up a virtual site to schedule taxpayers who must return to finish their tax returns.
- To add a new site in your state split or District who wants to use the system (yes, any Appointment Manager can do that)
- To independently manage site morning/afternoon or shifts.
- You have a team that provides services to the homebound and would like a way to keep track of their scheduling.
- To create a site for training, testing or other administrative purposes.
- Other reasons I haven’t thought of yet.

When you add the new site, the “Schedule” box will automatically be checked next to the “Other site access” giving your home site permission to schedule on the new site and you become the Appointment Manager for that site as well as your own site. If you change that permission, you will not be able to manage the new site. Make sure you assign someone to be that site’s Appointment Manager before removing yourself.

The new site will also appear in the drop-down list above the tabs so that you can easily switch back and forth between your own site and the new one.

Schedulers and permissions

The Schedulers tab assigns permissions to each individual who will be working in the appointment system.

Manage appointments Search Sign out							
Site being managed: Garden Grove Community Church							
Site Options		Schedulers			Taxpayers		
Add a new scheduler							
Name (★ = Home Site Appt Manager, ✎ = Administrator)		Role at this site	Callback List		Appointments		
			change	view	change	view	use res
Garden Grove Community Church							
Church office		Scheduler	✓	✓	✓	✓	
William Tell ★		Appt Manager	✓	✓	✓	✓	✓
Apple Valley Senior Center							
Johnny Appleseed ✎		Administrator	✓	✓	✓	✓	✓
Rosa Appleseed ★		Appt Manager	✓	✓	✓	✓	✓
Eden Valley Community Center							
Adam Smith ★		Scheduler				✓	
Eva Smith							

It lists the Schedulers who have a home at any site to which you have given access in the Site Options tab. Your own current site is shaded in green and other sites are in yellow to aid in knowing which site you are currently administering if there are several to choose from (like the new one added in the Site Options tab). All Administrators are also listed.

Individuals can only be assigned to one “home” site and must have a unique email address. Other site managers will give those individuals permissions for the sites they manage by checking the boxes in the yellow areas.

Change permissions

The defined “Roles” are:

- **Administrator** – only an Administrator can assign or remove Administrator permissions. They have access to all sites and schedules and can modify everything including the messages on the login window. More details can be found in the Installation and Administration document.
- **Appt Manager** – always has all permissions for the current site, can access the Tools menu and other configuration options in the appointment views.
- **Scheduler** – can be configured to only view appointments (access only to the Summary view) or make/change appointments. Can also be configured to only have access to view or modify the Callback list. The “use res” option allows a scheduler to use RESERVED slots or not – a local library scheduler, for example. Perhaps you want your District Coordinator or a neighboring site to be able to just view the state of your site (like Adam Smith above). Click on the appropriate box to add or remove the check mark.
- **None** – available for keeping a person on the list but disabling their permissions on a temporary basis.

Change the “Role” by clicking on the person’s Role box and then select the Role you wish them to have on your site.

You can change the Role and various permissions on your site for persons in other sites as well. It will not affect their home site permissions. You cannot change the Role or permissions for any Administrator.

Changing roles or permissions on this page is done without the need for a Save change button.

Add a new scheduler

Click on the “Add a new scheduler” button on the top left of this tab. The scheduler information box will appear:

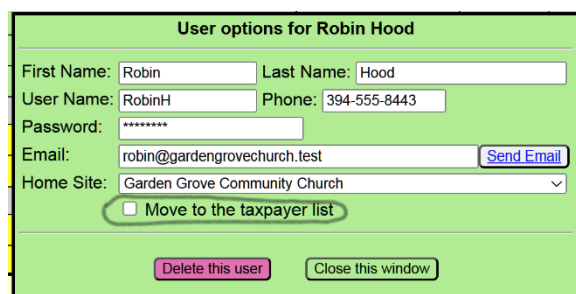

Enter the information requested and click Save new user.

You can assign a password if you wish or if you leave it blank, a random password will be generated and e-mailed to the new scheduler.

If the system tells you that the email is already in use, use the search menu to find who is using that email. If

their home is on some other site, that site’s Appointment Manager will have to change the person’s Home Site to your site. (They may be in the other site’s Taxpayer list.) Or, if they are an active Scheduler there and it’s their home site, allow that site to have access to your site as described earlier and set the person’s permissions in the yellow section corresponding to their home site. If their home is “Unassigned”, change their home site to yours; they will then appear in your “Taxpayers” tab. There will be a new box there which, if checked, will move them to your “Schedulers” tab.

Once added, click on the scheduler’s name to bring up a similar box which can then be edited as information changes.

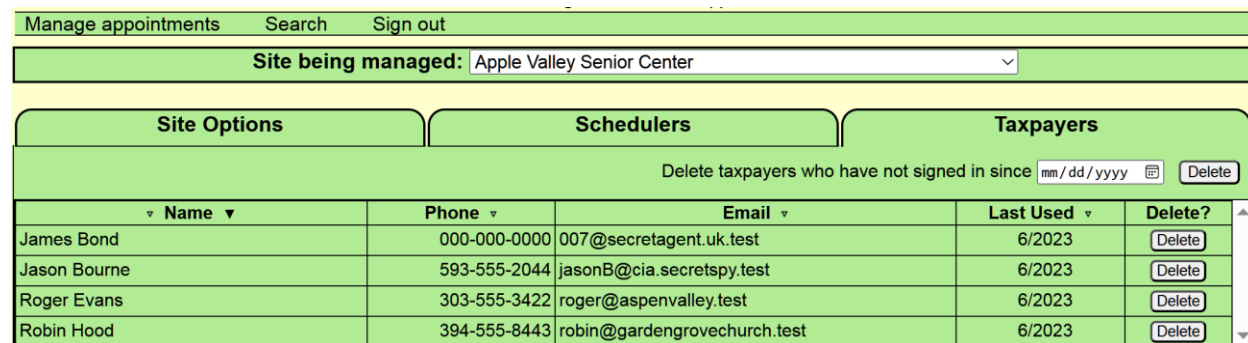

One new checkbox near the bottom is to Move to the Taxpayers list (next tab to be discussed). Check this if the Scheduler will no longer be active but wishes to retain their login access to make their own appointment on the internet. They will only, of course,

be able to make a reservation for sites who have that option enabled.

You can also change a person’s home site. You might do this if your ad-hoc site that you added spins off to be a full-status site and the person will be registered with them as their new home site.

Taxpayers list

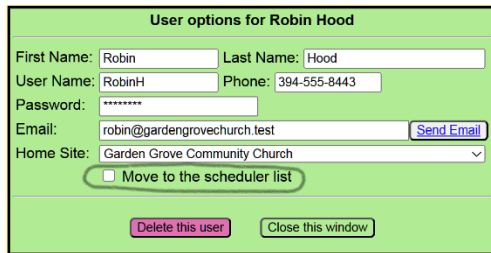

The Taxpayer tab lists all taxpayers who have logged in and made their own appointments at your site:

Name	Phone	Email	Last Used	Delete?
James Bond	000-000-0000	007@secretagent.uk.test	6/2023	Delete
Jason Bourne	593-555-2044	jasonB@cia.secretspy.test	6/2023	Delete
Roger Evans	303-555-3422	roger@aspennvalley.test	6/2023	Delete
Robin Hood	394-555-8443	robin@gardengrovehurch.test	6/2023	Delete

You can sort the list using the inverted triangles in the header of the table. In the Name column, the left triangle sorts by first name and the right triangle sorts by last name.

Click on the name to open their information box.

The screenshot shows a web form titled "User options for Robin Hood". It contains several input fields: "First Name" with "Robin", "Last Name" with "Hood", "User Name" with "RobinH", and "Phone" with "394-555-8443". There is a "Password" field with "*****" and a "Send Email" button. The "Email" field contains "robin@gardengrovehurch.test". The "Home Site" is a dropdown menu showing "Garden Grove Community Church". Below these fields is a checkbox labeled "Move to the scheduler list" which is currently unchecked. At the bottom of the form are two buttons: "Delete this user" and "Close this window".

If you know that this taxpayer only came to your site because they couldn't get an appointment at another site, you can change their Home Site appropriately and they will be moved from your Taxpayer list to the other site's Taxpayer list.

If you recruit this person to work at your site, you can move them to the scheduler list with the checkbox near the bottom. You will then have to go to the Scheduler tab and assign their Role and permissions.

As time goes on, this list may become quite lengthy so you may want to sort by "Last Used" date and delete those who haven't logged in for several years.

If the site becomes inactive and removed from the appointment system, these people will all be moved to the Unassigned site list until they log in and make an appointment at some other site.
